

SHREEYANSH SINGH

Full Stack Developer — AI Solutions — Secure Systems — Scalable Architectures

shreeyanshsingh07@gmail.com

linkedin.com/in/shreeyansh-singh — github.com/Shreeyansh-07 — Mumbai, India

Summary

Computer Engineering student passionate about building intelligent, user-focused applications that solve real-world problems. Solved 150+ problems on LeetCode and skilled in creating secure, scalable systems using Java, Spring Boot, React, Node.js, and Python. Experienced in full-stack development, AI-powered applications, backend engineering, and scalable system design. Strong problem-solving, teamwork, and leadership abilities.

Education

Vidyavardhini's College of Engineering and Technology, Mumbai

Aug 2023 – Present

Bachelor of Engineering — Computer Engineering

CGPA: 8.03

Experience

Full Stack Developer Intern — ESAMYAK SOFTWARE PVT LTD (On-site)

Jun 2025 – Jul 2025

- Led a team of 10 in designing and developing scalable full-stack web applications using Spring Boot (Java) and React.
- Built RESTful services with secure authentication and role-based access.
- Oversaw Docker-based CI/CD pipelines with GitHub Actions, ensuring seamless production releases.
- Managed project milestones, delegated tasks, conducted sprint reviews, and optimized performance by 35%.

Projects

AI Wearable Pendant — Smart Personal Assistant

Jun 2025 – Present

- Designing an AI-powered wearable pendant using ESP32-C3 and INMP441 to passively capture conversations for memory recall and contextual automation.
- Audio is processed in the cloud for summarization, intent recognition, and meeting extraction.
- Future pipeline includes conversational health monitoring and voice-triggered task automation (email, reminders).

GovGenie — AI-Driven Government Service Platform

Feb 2025 – May 2025

- Architected a secure, scalable backend using Node.js with modular REST APIs, OTP+JWT 2FA, and Aadhaar-based facial verification via Python + OpenCV.
- Integrated real-time chat via Socket.io and encrypted video calls using ZegoCloud.
- Enabled AI-based agent matching, fraud detection, and Dockerized microservice deployments.
- Implemented EasyOCR for handwritten OTP-based In-Person Verification (IPV) combined with facial matching for onboarding agents.

OpinionTrade — Incentivized Polling Platform

Sep 2024 – Dec 2024

- Built a full-stack opinion polling platform using Node.js, Express, Handlebars, and MongoDB with redeemable coupons and live leaderboards.
- Designed referral-based user acquisition and implemented rate-limited voting.
- Secured sessions using robust authentication mechanisms.
- Project officially granted copyright.

Achievements

- Winner — HackX 2.0 (2026), St. Francis Institute of Technology (SFIT), Mumbai — 1st Prize in FinTech & Digital Economy Domain.
- Winner — PixxelHack 1.0 (2025), Thakur College of Engineering and Technology (TCET), Mumbai — National-Level Hackathon.
- Winner — IDEAVERSE 1.0 (2026), Thakur College of Engineering and Technology (TCET), Mumbai — National-Level AI & ML Ideathon.
- Runner-up — COHERENCE (2026), GovTech Track — Financial Intelligence Platform for Public Fund Tracking and Anomaly Detection.
- 1st Rank — VNPS National-Level Project Showcase Competition (2025, 2026).
- 1st Rank — OSCILLATION, VCET Inter-College Technical Competition (2025, 2026).

Skills

Languages/Frameworks: Java, Spring Boot, JavaScript, Node.js, React.js, Express.js, Python, C/C++

Databases: MongoDB, MySQL

Tools: Git, Docker, GitHub Actions, REST APIs, Socket.io, Cloudinary, ZegoCloud

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Microservices, CI/CD, Secure Authentication, API Design

Coding Profiles: LeetCode (150+ Problems Solved)

Certifications

Oracle Fusion AI Agent Studio — HP Data Science and Analytics
